

CLAIMS

Please add new claims 27-28

27. A method for producing a lubricant, wherein catalyst is regenerated in the HCS reactor according to claim 21 to form a product; and

the product is further subjected to hydroisomerization to create the lubricant

28. A method for producing a fuel, wherein catalyst is regenerated in the HCS reactor according to claim 21 to form a product; and

the product is further upgraded to create the fuel

Respectfully submitted,

Charles J. Brumlik
